

STEM Field Trips Spring, 2019 Semester

- 1. National Gallery of Art
February 12, 2019
Washington, D.C.**

Students will learn how STEM and Art complement each other. They will learn how new art forms are created by STEM applications as well as how STEM enables the study of Art in more detailed ways. Students will also be able to see the special exhibit of the works of Gordon Parks.

- 2. Science Discovery Day at University of District of Columbia
March 8, 2019
Washington, D.C.**

Science Discovery Day is a wonderful opportunity for Middle School Students in the Washington, D.C area to participate in a workshop series guided by college professors, students and other professionals in the Science Community. Students will learn and actively engage in how to investigate topics related to Life Science, Physical Science and Engineering.

- 3. NIH, National Library of Medicine
April 10, 2019
Bethesda, MD**

Students will receive an overview of the work NIH does. An NIH scientist will discuss their specific research with the students and include hands-on activities. The visit will conclude with a walking tour of the National Library of Medicine.
